

CybersCool Defcon Inc.

Your All-In-One Security Awareness Training Suite

Empower Your Employees With Security Awareness Training That Works

Our solution revolutionizes security awareness training with a fully customizable solution, that offers relevant and realistic training, real-time insights, and full data privacy with on-premise deployment options.

ThriveDX

TEST

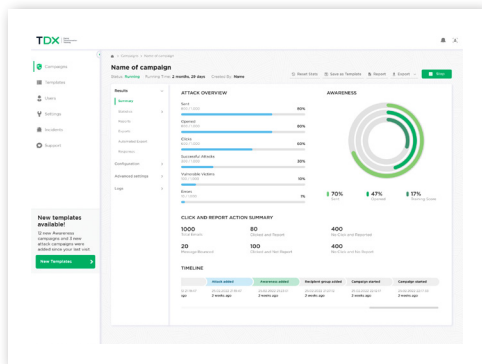

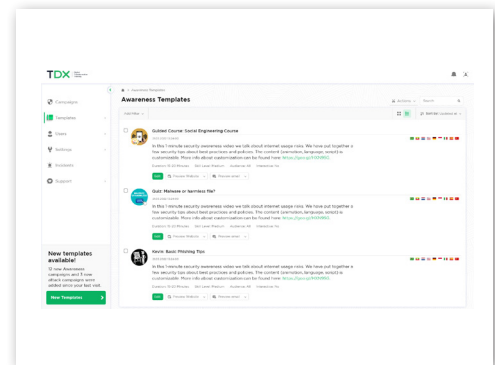

Real-attack scenarios to test your employees

Simulate the full cyber threat landscape using customizable, easy-to-edit templates for any type of phishing attack. Our predefined, multilingual attack simulations offer a safe learning environment and real-world experience for testing whether your employees are fully familiar with the dangers of the internet.

TRAIN

Interactive content tailor-made for your employees

We provide hundreds of interactive, web-based training modules to help you elevate your company's security awareness culture. Our continuous adaptive training model takes your employees through various security topics relevant to your industry and delivers customized content based on employee progress and performance.

MONITOR

Real-time reporting to track your success

A real-time reporting dashboard and automatic monthly reports allow you to measure employee progress, while maintaining full control and visibility of the program. You gain insights that are easy to understand, communicate to stakeholders, and take action on.
